

About SD-WISHEES:

Supporting and Developing Widening Strategies to tackle Hydroclimatic Extreme Events: Impacts and Sustainable solutions for cultural heritage (SD-WISHEES).
Vision: Enhanced collaboration and reach for research and innovation to tackle impacts of hydroclimatic extremes on cultural heritage. Mission: Developing innovative tools and strategies to enable collaboration between diverse stakeholders in Europe and beyond to inclusively address sustainable management of cultural heritage threatened by hydroclimatic extreme events.

Supported SDGs:

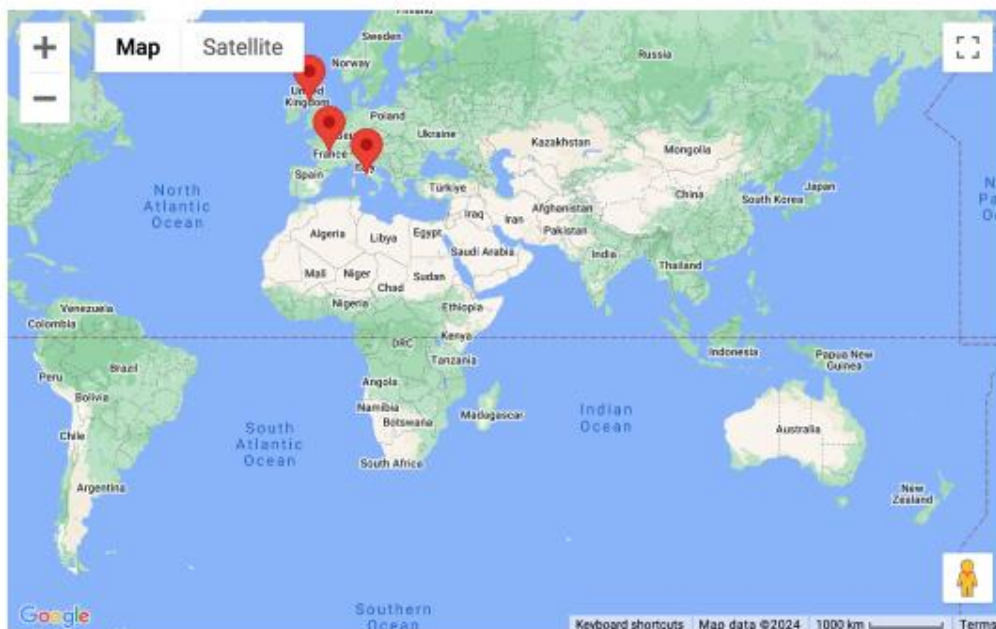

Progress at a glance:

As a EU-funded project, SD-WISHEES has a strong governing structure led by the Coordinator of SD-WISHEES: Emanuele Romano from the National Research Council of Italy - Water Research Institute branch (CNR-IRSA). The Coordinator of SD-WISHEES is supported by the Core team which is made of all the Work Package leaders. The SDG Dashboard for SD-WISHEES is under the responsibility of Work Package 4, led by GSES & Data for Good. SD-WISHEES started on January 2023 and its first progress will be evaluated on June 2024. For now, keep track of our progress by checking out all our projects! Reach out to orlane@data-for-good.org for more information.
